

There will be a track layer's class on Sunday, Nov 5, at 12.30 pm.

The location is still to be finalized, but will probably be Eastwood Park (Harshman Road entrance). This is for ANYONE interested in learning about tracking, or just helping out at our annual April trial (always the first weekend in April). NO EXPERIENCE NECESSARY! If you already are a track layer, please come out and share your knowledge and experiences!

We'll be going over how to plot and lay TD, TDX, and cross tracks (on a TDX track), and all the ins and outs of track laying (where to leave objects, which flags to pull, how to make the turns, what to do and what not to do for various "what if's"). And of course, since it's tracking-related, there will be food! We'll put out another announcement here if we have to set a rain date.

This is great exercise, great food, and we generally have a lot of fun. Learning how to plot and lay tracks is also a great way to start learning about tracking with your own dog.
